ANNUAL REPORT OF 2022-23

Warm regards and thanks to God and everyone for the kind of support you have shown to the school and its concerned. I am very pleased to say that making the move to NER SCHOOL OF EXCELLENCE has been a wonderful decision and I am enjoying all that the school year has presented me with every passing year.

About School:

NER School of Excellence is built in spacious 3.2 acres surrounded by greenery. It has a huge sprawling playground with all sports facilities. The school is fully equipped with digitalized smart class rooms, along with all facilities and World-class infrastructure to complement the academic process and extra-curricular activities

Vision:

We envision emerging as a top-notch educational institution at the NER School of Excellence by preparing children for a purposeful future. We give a concrete shape to our vision by creating an enriching learning environment that promotes a quest for knowledge and life-long learning among the students. We also endeavour to empower our students to grow into individuals with able bodies and fertile minds. Because we strongly believe that able-bodied people with fertile minds can generate ideas and put them into practice, which can pave the way for their bright future.

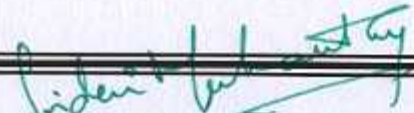

Mission:

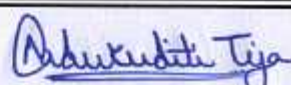

NER School of Excellence came into existence with the idea of providing quality education to rural students. Our goal is to create a rich learning environment for our students to enable them to compete with their urban counterparts. Empowering them to grow into socially responsible individuals who can contribute to nation-building is also a part of our mission.

SCHOLASTIC

At NER School of Excellence the Academic Year 2022-23 started on April 2022. The school has accommodated students from play group to Grade IX.

The curriculum that is followed is completely CBSE based. The lesson starts with an activity. The class room teaching methodology includes Pen and Paper test, Quiz, model making etc. There is an audio and video with PPT that are being projected and also making them a part of the curriculum. The children are given the complete Kinaesthetic knowledge so that the child is aware and gets the complete concept thoroughly.

The children are also exposed to the AI knowledge, coding as their Skill subject. As per the level the books and the curriculum has been designed so that the child is ready to meet the competitive world.

CO-SCHOLASTIC

This area has always been playing a vital role as it goes hand in hand with the Academics. The huge sprawling ground helps the child to develop interest towards sports in different areas like Tennis, Football, Basketball, Volleyball and cricket. The indoor games include Chess, Carrom Board and Table Tennis.

ART & CRAFT

This area helps the child to develop the subject in an integrated way. The child can develop the skill of art while learning the subject and integrating it with other subjects and create his/her skills giving a shape to a model or an art form or a presentation.

‘Change is inevitable, only growth is optional.’

It is so true that change is inevitable in all aspects of our lives, especially here at school. New shade sails go up; spaces are rearranged; new curriculums are presented; other ideas are introduced; different opinions are offered; other decisions are made; old families leave; new families arrive; old technology leaves; new technology arrives; some staff leave; some staff arrive; kids win some friends and kids lose some friends.

Championship for children...a sacred privilege...

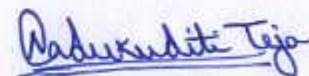

I am passionate about my role as a parent and I am passionate about the opportunity I have as a leader in this school to champion for children. I think if we understand our roles-as parent, teacher or leader, as a most sacred privilege then it really helps us to appreciate the sacredness of our work as parents and educators, and the responsibility we all have fulfilling this role to the very best of our ability.

Thanks & Regards,
